

IN THE CLAIMS:

Kindly add the following additional claims 21-24 as shown in the following listing of claims, which replaces all previous listings and versions of claims.

1. (currently amended) A graphical display adjusting system comprising: means for selecting one graph out of a plurality of graphs which are displayed on a screen by specifying a display area of an axis corresponding to the selected graph by a pointing device; and means for scrolling the selected graph by another operation of the pointing device.

2. (currently amended) A graphical display adjusting system comprising: means for selecting one graph out of a plurality of graphs which are displayed on a screen by specifying a display area of an axis corresponding to the selected graph by a pointing device; and means for displaying the selected graph in an enlarged or reduced scale by another operation of the pointing device.

3. (currently amended) A graphical display adjusting system comprising: means for selecting one graph out of a plurality of graphs which are displayed on a screen by specifying a display area of an axis corresponding to the

selected graph by a first operation of a pointing device; means for scrolling the selected graph by a second operation of the pointing device; and means for displaying the selected graph in an enlarged or reduced scale by a third operation of the pointing device.

4. (previously presented) A graphical display adjusting system according to claim 1; wherein the operation of the pointing device for performing scrolling of the selected graph is performed by dragging on the axis display area on the screen.

5. (previously presented) A graphical display adjusting system according to claim 2; wherein the operation of the pointing device for performing scrolling of the selected graph is performed by dragging on the axis display area on the screen.

6. (previously presented) A graphical display adjusting system according to claim 1; wherein the operation of the pointing device for performing enlarged display or reduced display of the selected graph is performed by a rotating wheel.

7. (previously presented) A graphical display adjusting system according to claim 2; wherein the operation of the pointing device for performing enlarged display or reduced display of the selected graph is performed by a rotating wheel.

8. (previously presented) A graphical display adjusting system according to claim 1; wherein specification of the display area of the axis on the screen where the one graph is selected is performed by clicking a mouse.

9. (previously presented) A graphical display adjusting system according to claim 2; wherein specification of the display area of the axis on the screen where the one graph is selected is performed by clicking a mouse.

10. (previously presented) A graphical display adjusting system according to claim 1; wherein the display area of the axis on the screen where the one graph is selected is specified by bringing a cursor of the pointing device to the area.

11. (previously presented) A graphical display adjusting system according to claim 2; wherein the display area of the axis on the screen where the one graph is selected is specified by bringing a cursor of the pointing device to the area.

12. (currently amended) A graphical display adjusting system comprising: means for selecting one graph out of a plurality of graphs which are displayed on a screen by specifying a display area of an axis corresponding to the selected graph by a pointing device; and means for temporarily eliminating one or more of the non-selected graphs from the screen by issuing a temporary elimination command by the pointing device specifying the axes of the one or more non-selected graphs which are to be temporarily eliminated.

13. (currently amended) A graphical display adjusting system according to claim 12; wherein the display area of an axis corresponding to the selected graph has markings denoting different values of the selected graph along the axis.

14. (currently amended) A graphical display adjusting system according to claim 3; wherein the display area of an axis corresponding to the selected graph has markings denoting different values of the selected graph along the axis.

15. (currently amended) A graphical display adjusting system according to claim 2; wherein the display area of an axis corresponding to the selected graph has markings denoting different values of the selected graph along the axis.

16. (currently amended) A graphical display adjusting system according to claim 1; wherein the display area of an axis corresponding to the selected graph has markings denoting different values of the selected graph along the axis.

17. (currently amended) A graphical display adjusting system according to claim 12; wherein the display area of an axis corresponding to the selected graph is not ~~an axis of either~~ a scroll bar or a scaling bar.

18. (currently amended) A graphical display adjusting system according to claim 3; wherein the display area of an axis corresponding to the selected graph is not ~~an axis of either~~ a scroll bar or a scaling bar.

19. (currently amended) A graphical display adjusting system according to claim 2; wherein the display area of an axis corresponding to the selected graph is not ~~an axis of either~~ a scroll bar or a scaling bar.

20. (currently amended) A graphical display adjusting system according to claim 1; wherein the display area of an axis corresponding to the selected graph is not ~~an axis of either~~ a scroll bar or a scaling bar.

21. (new) A graphical display adjusting system according to claim 12; wherein the display area of an axis corresponding to the selected graph comprises a coordinate axis of the selected graph.

22. (new) A graphical display adjusting system according to claim 3; wherein the display area of an axis corresponding to the selected graph comprises a coordinate axis of the selected graph.

23. (new) A graphical display adjusting system according to claim 2; wherein the display area of an axis corresponding to the selected graph comprises a coordinate axis of the selected graph.

24. (new) A graphical display adjusting system according to claim 1; wherein the display area of an axis corresponding to the selected graph comprises a coordinate axis of the selected graph.
